WELCOME TO MOUNT ALLISON UNIVERSITY

When you first arrive at Mount Allison, you know this University is special. The char

possession of silver spoons. After entertaining their guest, the Allison were informed that if they could afford silver spoons, they could afford to pay more taxes. They left Ireland shortly thereafter. The spoons are on display in the main Library. In June 1839, Sackville merchant Charles Frederick Allison proposed to the Wesleyan Methodists that a school of elementary and high learning be built. His offer to purchase a site in Sackville, to erect a suitable building for an academy, and to contribute operating funds of 100 pounds a year for 10 years was accepted. The formal opening of the Mount A

There are three circumstances in which students can reduce the amount of the above payments. The first is when students have been awarded Mount Allison scholarships and bursaries; please refer to the offer letter for information regarding disbursement. The second is when students have proof of the amount of the Canada Student Loan they will receive. The third is when students have an external sponsor who will be invoiced by the University; this category does not include external scholarships and bursaries.

When the amount paid has been reduced because students will receive a loan from the Canada Student Loans Programme or have external sponsorships, temporary registration status will be granted. It is the

4.5.4 Withdrawals - Fall and Winter Continuous Learning, Moncton, Miramichi

All refunds are calculated from the date that Fall and Winter Continuous Learning Moncton or Miramichi courses start and the date that the written request for withdrawal is received by the Office of Student Services. There will be no fee charged for courses dropped within the first week of classes. For withdrawals after the first week of classes, fees will be calculated as 15% of the tuition for the term times the number of weeks or part weeks since the first day of classes. There is no credit (refund) given after the sixth week of classes.

4.5.5 Residence and Meal Plan Withdrawals

Students wishing to withdraw from residence and/or the meal plan must begin the process with the Dean of Students located in the Student Life Office, University Centre. Withdrawal is not effective until the Dean of Students has approved the withdrawal request. The date of withdrawal for the purpose of fee administration will be the date this approval is given, or the date students have checked out of residence and meal cards and keys have been returned, whichever is later.

The student's account will be adjusted to reflect residence and/or meal plan charges as follows:

6.13 ACADEMIC OFFENCES

6.13.1 Academic Dishonesty

All students at Mount Allison are expected t

determined by the Registrar after consultation with the student and the instructor and will be given a letter grade. A deferred examination in a Fall term 3 credit course will normally be written during the first week of the Winter term. A deferred examination in Winter term or full year courses must normally be written by the end of May, to be arranged by the Registrar in consultation with the instructor and the student. If the examination cannot be written by that time, the student's academic standing will not be assessed until final grades have been submitted. Students who do not clear their deferred status by the end of the supplemental examination period in September prior to the start of classes, will receive a non pro-rated final grade based on course work completed prior to the final examination and academic standing will be assessed based on these results.

6.14.4 Extended Deadlines for Completion of Course Work

If illness or compassionate reasons prevent a student from submitting all course work by the prescribed deadlines, the Registrar and the instructor may agree to extend the deadlines for completion of the work for up to four weeks beyond the original deadlines. In all cases of illness, a doctor's certificate explicitly covering the inability to complete the work must be submitted to the Registrar before the end of the examination period. If the work is not completed by the specified deadline, a notation of 'INC'- Incomplete, will be recorded on the transcript until a final grade is submitted. If no grade is submitted, the notation of 'INC' remains on the transcript with a grade point value of '0.0' and counts as a failing grade. If the student is unable to complete the work by the specified deadline, the student may request an extension to the deadline. An extension may be granted o

8 CONTINUOUS LEARNING

The Department of Continuous Learning provides educational opportunities for part-time, mature and evening students. It also provides the opportunity for full-time students to take additional courses. It helps mature part-time day students through the admissions and registration process and aids them in obtaining needed advice and counselling. The department also assists Student Life with orientation activities for these students.

8.1 EVENING CREDIT PROGRAMME

An evening credit programme is offered during the Fall and Winter academic terms. It is possible for students to earn many of the 120 credits necessary for a degree through this programme. Evening courses are offered each year in Moncton, and Sackville. Courses may also be arranged in other communities upon request. The Department attempts to introduce new courses into this programme to meet changing demands of adult learners.

8.2 MIRAMICHI FIRST YEAR AT HOME PROGRAMME

The Department coordinates Mount Allison's contribution to the Cooperative University Programme on the Miramichi. This programme, offered in partnership with St. Thomas University and the University of New Brunswick, provides a first year university programme in Arts, Sciences, Social Sciences, and Commerce to students on the Miramichi. This enables Miramichi students to complete their first year of unive

8.10 CONTINUOUS LEARNING COURSES AS OVERLOAD

During the Fall and Winter terms, full-time students registered at the Sackville Campus, who register for additional credits (i.e. more than 30) which have been approved in writing by an Academic Dean to be taken through the Department of Continuous Learning will be charged for these courses on a per-course basis. These courses MUST be completed by the end of each academic term, and ONLY under exceptional circumstances can they be extended into the next session.

ANTHROPOLOGY

Anthropology is the study of humans across space and time. It is essentially cross cultural, and attempts to understand the way of life of other peoples across the world, how they have attempted to solve pan human problems, food, shelter, and repopulation; and what worlds of meaning and explanation they have created. It is a comparative discipline seeking similarities and differences between societies and environments. Its study leads to a heightened awareness of the importance of culture and a sensitivity to cultural differences.

CANADIAN STUDIES

With the establishment of the Edgar and Dorothy Davidson Chair of Canadian Studies in 1969, Mount Allison University developed its programme of Canadian Studies, at the time the only one of its kind in Canada. The programme was further strengthened in 1977 with the endowment of the Winthrop Pickard Bell Chair of Maritime Studies. The entire programme is designed for those students who wish to increase their knowledge of Canada, its history, institutions and culture.

Unity in the Programme is achieved by concentrating on the interrelationships of disciplines within the Canadian context.

Participating disciplines include Economics, English, Fine Arts, French, Geography, History, Linguistics, Music, Political Science, Religious Studies, Sociology, and Anthropology.

The comprehensive nature of the Programme and its innate flexibility prepare the student for entrance to a wide range of careers and activities, in post-graduate studies in many areas of concentration, as well as in business, government, journalism, law, library science and social work.

Interdisciplinary B.A. Programmes

MINOR in Canadian Studies is 24 credits earned as follows:

REGIONAL PROTEST IN ATLANTIC CANADA

Format: Seminar 3 Hours

Prereq: CANA 2000 or CANA 2001 and 2011; or permission of the Coordinator of the Canadian Studies teaching programme

Exclusion: CANA 4650

This course explores the dynamics of political protest in Atlantic Canada as a response to regional economic underdevelopment. It looks specifically at the origins of Atlantic economic disparity, relations between Ottawa and the A

programme. The courses required for the B.Sc. Chemistry Honours degree are all listed below. The required chemistry credits are ones that provide for study of the main branches of Chemistry in some depth. The required twelve credits from Mathematics and the six credits from Physics give minimum background essential for work in Chemistry. Honours students are given a special opportunity to participate in chemical research with faculty members in the Thesis (C4990) course. This research is normally carried out in the summer months following the third year.

HONOURS in Chemistry is 84 credits earned as follows:

- 36 credits as in first 5 lines of Major except that the 3 from Mathematics or Computer Science referred to in line 3 is restricted to Mathematics 2121 or 2221
- 24 from Chemistry 3111, 3121, 3231, 3241, 3321, 3331, 3411, 3421

COMPUTER SCIENCE

The study of computing ranges from hands-on applications to pure theory, and includes the analysis of algorithms, the study of computer architectures, compilers and operating systems, networks, and software engineering. Our goal is to introduce students to all facets of the discipline, and to give them an appreciation of the historical, ethical, and social context of computing, and the responsibility of the computer professional and casual computer user in a modern society.

The Department offers a broad variety of courses and programs in Computer Science. Introductory courses may teach programming and theories of computing or offer a general overview of the use and application of popular microcomputer software; more advanced courses deal with topics ranging from artificial intelligence and the role of computers in society to the design and implementation of advanced hardware or software systems. All courses in the computing curriculum offer a blend of theory and practical application, with many of the offerings having a significant project component in which students are given the opportunity to apply the classroom material to real-world problems. Courses are designed to address the needs of a wide variety of users, from the casual to the professional. Some students may enrol in a course to familiarize themselves with the microcomputer and application software, while others may choose to pursue a minor or a major in Computer Science. Students may choose to select Computer Science in combination with areas such as English, Economics, Philosophy, or Physics. Mount Allison has been quite successful in placing its students in graduate programs in Computer Science, while many others have found employment after graduation in one of the many computer-related fields.

HONOURS PROGRAMME

Students with a strong interest in and aptitude for the subject may wish to seek an Honours Degree in English. The requirements are sixty-six English credits, as outlined below. Students must apply to the Honours Coordinator to do Honours in January of their junior year. In the senior year Honours candidates must take English 4990, the Honours Thesis, in which a grade of at least B must be achieved for Honours.

HONOURS in English is 66 credits earned as follows:

- 42 credits as in the first four lines of the Major, including English 2211
- 6 from English 4990
- 18 from English at the 3/4000 level, including 3 credits each from two additional subject areas (for a total in the Honours programme of seven subject areas), chosen in consultation with the Honours Coordinator

Students are encouraged to take more than the minimal number of English courses required; this will give them a wider coverage of the subject. ("Core" selections often include the Shakespeare courses and one course in Canadian literature)

MATHEMATICS

Mathematics is a discipline which has been said to be the Queen of the Sciences, and is the foundation of most modern quantitative and qualitative studies. The permanence and universality of mathematics throughout the ages is a consequence of its very nature. Mathematics is cumulative, developing from the earliest use of numbers by prehistoric civilizations to the highly deductive nature of geometry as developed by the Greeks, from the practical applications of calculus developed in the seventeenth century to the modern use of number theory in computer cryptography. Mathematics has many faces, from practical uses of its statistical tools to theoretical studies of abstract relationships. Our goal is to introduce students to all facets of the discipline, and to give them an appreciation of the historical, theoretical and applied nature of the discipline, as well as a full understanding of the beauty of the subject.

The Department offers a broad variety of courses and programs in Mathematics. Beginning courses may introduce students to the applications to which Calculus may be applied or the practical uses of statist

Successful science claims to give us *knowledge* of what *exists* in the universe, and it claims to *explain* why what happens in a given localized system happens. The italicized words in the last sentence indicate philosophical assumptions within science which this course will explore. Based on historical cases, philosophical interpretations will be compared from logical positivism to Kuhnian paradigms, and the most recent critiques from social constructivism and feminism.

PHIL 2611 (3CR)
INTRODUCTORY LOGIC

Format: Lecture/Discussion 3 Hours

Prereq: Three credits from Humanities 1600 Series; or permission of the Department

A general introduction to the study of logic. The course will begin by examining the basic structure of arguments, common reasoning fallacies, and issues central to inductive and deductive reasoning. Further topics may include Mill's methods, syllogistic reasoning, Venn diagrams, truth tables, sentential logic, and an introduction to quantification theory.

PHIL 2701 (3CR)
INTRODUCTORY ETHICS

Format: Lecture/Discussion 3 Hours

Prereq: Three credits from Humanities 1600 Series; or permission of the Department

An introduction to the history and philosophical problems of ethics in the western tradition. This will acquaint the student with a number of received traditions based on metaphysical, religious, rational, and pragmatic grounds, as well as introduce certain fundamental perennial problems of moral decision-making.

PHIL 2801 (3CR)
INTRODUCTION TO METAPHYSICS

Format: Lecture/Discussion 3 Hours

Prereq: Three credits from Humanities 1600 Series; or permission of the Department

An introduction to the study of metaphysics understood broadly as the study of the fundamental nature of reality. This will include the study of various themes including the nature of substance, divinity, causation, appearance and reality, the one and the many, mind and matter.

PHYS 3521 (3CR)

PHYSICS OF THE LIVING BODY

Format: Lecture/Discussion 3 Hours, Laboratory 3 Hours

Prereq: PHYS 1051 and MATH 1111 and at least third year standing; or permission of Department

Exclusion: PHYS 3521 (Biosensory Physics)

This course is intended primarily for students in biology and psychology. The course will introduce and describe from a physics perspective the many physical processes involving living organisms. Study will include the human body, with examples from other animals given for purposes of comparison. Topics will include sound and hearing (including Fourier analysis and resonance), light and vision (including microscopy), electrical pulses, electrocardiac measurement, mechanics of body motion, scaling relations, fluid flow, feedback relationships and thermodynamics.

PHYS 3581 (3CR)

MEDICAL PHYSICS

Format: Lecture/Discussion 3 Hours, Laboratory 3 Hours

Prereq: PHYS 1051 and MATH 1111; PHYS 1551 or PHYS 3521 ; or permission of Department

This course is intended both for physics students who are considering a career in medical physics or in the field of medicine, and for students in other programmes with similar interests. The course will consider fundamental concepts of ionizing radiation, diagnostic applications of medical physics, and therapeutic applications of medical physics. Topics in the diagnostic area will include x-rays, computed tomography, magnetic resonance imaging, positron emission tomography, nuclear medicine and ultrasound. Topics in the therapeutic area will include radiation generators, absorbed dose calculations, dose measurement, treatment planning, quality assurance and brachytherapy.

PHYS 3601 (3CR)

FLUID MECHANICS

Format: Lecture/Discussion 3 Hours, Laboratory 3 Hours

Prereq: PHYS 1551 and MATH 1121; or permission of the Department

The objective of this course is to develop an understanding of fluid properties. Topics include: Fluid properties, static forces in fluids, kinematics and dynamics of flow, Bernoulli's and momentum equations, dimensional analysis and similitude, and flow through pipes.

PHYS 3701 (3CR)

THERMODYNAMICS

Format: Lecture/Discussion 3 Hours, Laboratory 3 Hours

Prereq: PHYS 2801 and MATH 2111, or permission of the Department

The objective of the course is to develop a clear and broad understanding of the First and Second Law of Thermodynamics, with application to a wide range of problems. Topics include: the general energy equation, First Law, Second Law, entropy, limiting-cycle efficiencies, irreversibility and availability, steam power plant, refrigeration and gas engine applications.
